

Adjustable Scent Diffusing System

AirQ100

The Air-Q100 system uses Prolitec's patented technology to diffuse fragrance and odor treatment products into the air.

Technical Characteristics

Reference : Air-Q 100
Type : 1 head nebulizer (disposable cartridges)
Diameter of particles : Typically less than 1 μm

Power Input

Input : 100-240 VAC / 0.6 A
Frequency : 50 / 60 Hz
Protection : Switching power supply
Internal Power : 15 VDC / 1.0 A

Dimensions

Height x Width x Depth : 149mm x 140mm x 140mm
Total weight : 1.4 kg

Placement Options

Stands upright on table, desk, bookshelf, counter, floor

Performance

Up to 283 m³ served with 1 air change per hour.
Programmable start & stop times, count down and 24/7 modes.
Adjustable output with 50 settings.
Top output location with director attachment.

Cartridge

One 90ml cartridge containing fragrance and odor treatment products

Enclosure

Polyester plastic enclosure

Safety Approvals

FCC part 15
UL power adapter
CE & ROHS compliant

Environment

0°C to 40°C operating temperature
85% or less operating relative humidity

Accessories

Available colors : black, pearl white, silver
Custom colors available with minimum order quantities

Made in USA
